Absorbable Gelatin Hemostats

GELITA-SPON® STANDARD

GELITA-SPON® RAPID³

HIGH
PERFORMANCE

GELITA TUFT-IT®

INNOVATION BY
GELITA MEDICAL

Shape

Product Definition

*Absorbable Gelatin Sponge
Hemostat, USP*

*Dry Use Absorbable Gelatin
Sponge Hemostat, USP*

*Absorbable Non-Woven Gelatin
Hemostat*

Benefits

- Different densities
- Different types of shapes and sizes- ideal for various surgical applications
- Can be easily cut into pieces

- **Ready to use dry** - no wetting!
- **Achieves hemostasis in less than 1 minute in 84% of the cases (n=108)¹**
- **Absorbs blood instantly**- up to three times faster than with conventional USP sponges²
- **Easy (re)positioning**
- **Particularly suitable for minimally invasive (endoscopic) procedures**

- **Multi-layered**- can be tufted and peeled off in layers and applied gradually to achieve optimal results with minimal use of product
- **Ideal for quick control of bleeding** in irregularly shaped structures and areas difficult to access
- No significant swelling
- High blood and fluid absorption
- Adheres perfectly to bleeding site, but also easy to reposition

Application

- Use **wet** for best performance

- Use **dry** for best performance

- Ready to use **dry**

Characteristics

- Made from 100 % pharmaceutical gelatin
- Natural & safe
- pH-neutral character - can be combined with drugs*
- Stops bleeding effectively
- Easy handling
- High patient comfort - can be left in situ
- Sterilized by means of gamma irradiation

* Attention should be paid to the instruction for use of the respective active ingredients

Indication

- To stop capillary, venous and arteriolar bleeding in general surgery

Biodegradation

- Fast and complete resorption
- Minimal risk of encapsulation
- Totally biodegraded in max 3 weeks in animal study³

Absorbable Oxidized Cellulose Hemostats

GELITA-CEL® STANDARD

GELITA-CEL® FIBRILLAR

GELITA-CEL® X-SORB

Shape

Product Definition

Absorbable Oxidized Cellulose Gauze Hemostat

Non-Woven Absorbable Oxidized Cellulose Hemostat

Absorbable Oxidized Cellulose Gauze Hemostat, Heavy Duty

Benefits

- Variable sizes
- Convenient delivery via trocar in laparoscopic procedures – no memory effect
- Not lubricious after contact with fluid
- Can be sutured

- Variable sizes
- Non-woven material can be tufted and peeled off in layers and applied gradually
- High flexibility – ideal for irregularly shaped bleeding sites

- Variable sizes
- Ideal for heavier bleeding – greater capacity, higher density and larger contact area
- Keeps its flexibility without memory effect
- Not lubricious after contact with fluid
- Can be sutured

• **Antibacterial activities** – in lab tests the product showed bacteriostatic / bactericidal properties. Nevertheless it is not intended or claimed as a substitute for anti-microbial or similar agent to control or prevent infections.⁴

Application

- Ready to use dry

Characteristics

- Made from 100 % oxidized cellulose
- Natural & safe
- Stop bleeding effectively
- Easy handling – do not stick to gloves or instruments
- High patient comfort – can remain in the body
- Sterilized by means of gamma irradiation

Indication

- To stop capillary, venous and arteriolar bleeding in general surgery

Biodegradation

- Fast and complete resorption
- Totally biodegraded by the body in 4 weeks
